Gentlemen:

The attached patent application is a 'continuation-in-part' application on the Cyclops design, wherein we have added claims covering the addition of oxygen enrichment of the second-stage (ie, slot) combustion air. Sample data is included illustrating the region in which 'ultra low NOx' is maintained even with up to 30% O2 in the combustion air mixture.

As this represents additional claims to the original Cyclops patent application, we are requesting your signatures on the attached assignments and declarations pages.

Copies of the documents are enclosed for your records.

Thank you for your assistance in this matter.

Best Regards,

Dave Schalles
